

AIROPURE ODOUR CONTROL AGENT

DESCRIPTION

Unlike alternative odour control additives Airopure's sophisticated science means it combines physically with the odour molecules and destroys them completely. Airopure is available as an odourless product or now with new "fresh" or "berry" fragrance.

MAIN USES

Airopure technology has been designed to eliminate odours including hydrogen sulphide, ammonia, organic sulphur and nitrogen compounds.

Airopure also inhibits the growth of gram positive and gram negative bacteria such as: Legionella, E-coli, MRCS, CDIFF, Listeria and many more.

ADVANTAGES

- 100% Biodegradable
- Environmentally friendly
- Non carcinogenic
- Non-hazardous, non-irritant and safe under CHIP, COSHH, REACH
- Recognised as safe in the food industry
- Non-acidic or caustic

APPLICATIONS

- Head space spraying at a concentration as low as 500:1 with water
- Direct spray onto waste material at a concentration as low as 50-1
- Direct injection into liquids at a concentration of as low as 1000:1 with water
- Control of Legionella at a concentration as low as 150-1 with water
