Air-C 150

The mobile ultrasonic humidifier atomizes water into 1 - 5 μm aerosols by means of ultrasonic oscillations.

A built-in fan distributes them into the room via a distribution pipe, the aerosol mist (cold vapor) mixes with the ambient air, evaporates completely and distributes evenly in the room.

Air-C Duo

The mobile 2-in-1 evaporative humidifier and air purifier AIR-C DUO cleans the air with the help of a HEPA filter and reduces impurities in the air by up to 98.43%, such as allergens, viruses, bacteria, and dust. At the same time, natural evaporation ensures the right humidity. The recommended room size for air purification is up to 50 m²*, and the recommended room size for humidification is up to 20 m²*. The humidification capacity is 150 ml/h.
